

# Philosophy of Ministry

## Mission

The Eastern PA District exists to **resource, equip, enable, and empower** its pastors and congregations to be multiplying, healthy Great Commandment-Great Commission churches.

## Vision

Healthy churches will be prepared to serve as **centers for the multiplication of churches** within the borders of the district and to the ends of the earth.

- Making available assessment and consultation processes to the churches.
- Building quality and character into pastoral and lay leadership teams consistent with the biblical definition of a healthy church.
- Coaching pastors and churches toward health and reproduction.
- Providing opportunities for training pastors and laity in models of healthy churches through on site visits, both in America and around the world.
- Creating venues for consultation in healthy church settings.
- Connecting the churches to the reproducing of healthy churches through C&MA ministry amongst unreached and under evangelized people groups.
